Welcome Address

The art and science of percutaneous interventions are continuously growing, the interventional practice had witnessed development of new techniques, imaging modalities, hard ware and supporting pharmacotherapy helping to advance the field and improve the patients care and outcome.

The meeting involves experts from Europe and the Arab world in addition to distinguished Professors from all over Egypt; all gathering to present the latest advances in the field of PCI, percutaneous valve interventions, new imaging modalities, adjuvant pharmacotherapy and intracoronary pharmacotherapy.

The meeting includes lectures, debates, live in a box and case presentation in addition to an educational course for the young interventional cardiologists taking place over three sessions followed by a MCQ exam on Friday.

We will be honored by your participation as a faculty, guest speaker or attendee that will surely support our mission and contribute to the success of the meeting.
