A WORD OF WELCOME

It is a great pleasure to welcome you all to the land of Egypt, the cradle of civilization. It was here that the famous Egyptian physician, Imhotep, who was deified as the "God of Medicine" by the Egyptians, uttered his famous idiom:

"I have what I have given"

It was also here that the equally renowned Greek physician, Hippocrates, learnt it, and transmitted it to Europe. These words became the essence of the exchange of knowledge. For if one withholds what knowledge he has to himself alone, it is as if he does not possess it.

Paediatric Cardiology is one of those sciences where propagation of knowledge is crucial to its advancement. If this exchange occurs in an atmosphere of good climate, ancient background, and warm culture and hospitality, the times become memorable and are often dwelt upon repeatedly. This is our intention of welcoming you from all over the world.

May your stay with us be peaceful, pleasant, enjoyable and memorable, and may you utilize your time to the full both scientifically and culturally.

Prof. Mohamed Hamed

*Founder of the Egyptian Working Group of Pediatric Cardiologists
& Honorary Chairperson of the Conference*

A word from the President of the Working Group

It gives me great pleasure to welcome you all to the second international pediatric cardiology and cardiac surgery meeting organized by the Egyptian Working Group of Pediatric cardiologists.

Organizing this meeting was challenging and it was only possible with the help of all Egyptian pediatric cardiologists and enriched by the participation of renowned pediatric cardiologists from all over the world.

The topics were chosen with care, focusing on our problems, challenges and state of the art technology. Our aim is to share experiences and propagate the knowledge amongst the younger generation of physicians and surgeons in order to achieve a better care for our children.

Again I warmly welcome you and wish you a fruitful meeting.

Prof. Maiy Hamdy El-Sayed
